**Subject:** Submission on 1193 irradiation of all fresh fruitand vegetables

I oppose irradiation of freshfruit and vegetables in Australia bacause irradiation damages food by breaking up molecules and creating free radicals.

The free radicals bouce around in the food, damage vitamins and enzymes and combine with pestisides form new chemicals - URP's - benzene, formaldehyde or others which are uniques to irrdated food that never studied.

What is next nuclear irradiation of food?

Kind regards
