**Subject:** Submission Qld Gov Applic A1193

**Categories:** [REDACTED]

I am writing to strongly object to the above application to have ALL fruits and vegetables irradiated!

The safety of irradiating fruit and vegetables is not based on ANY evidence available in peer-reviewed studies in reputable journals.

There are alternatives!

I also object strongly to the bringing forward to of the closing date for submissions from April to December ... in a Parliamentary democracy there is NO justification for this blatant disregard for established due process!

I am childless, that does not mean that I do not think about the current children in the world and their children's children: please consider them and deny the application!

Sincerely

[REDACTED]
