Subject: 'Submission on A1193 Irradiation of all fresh fruit and vegetables'

Categories: [Redacted]

I am writing to express my concern about irradiation of fresh food.

FSANZ invites written submissions on the Assessment of the following Application by 6pm (Canberra time) 24 December 2020 (extended from 11 December 2020):

- A1193 - Irradiation as a phytosanitary measure for all fresh fruit and vegetables:
to extend the option of phytosanitary irradiation to all types of fresh fruits and vegetables.

I believe that other non-chemical and non-invasive methods can be used.

Irradiation of fresh food damages the nutritional value of the food and adds to the risks caused by the chemicals used.

This will harm the health of Australians.

Yours Sincerely,
