Subject: RE: application (A1039) to license hemp foods as human food

Categories: Blue Category

Dear Sir/Madam

I have heard that this application is up for review.

I would be very pleased if we were able to purchase this health food in Australia. I find the current situation very curious where it is considered criminal to consume the non drug form of hemp. I learnt about it's health benefits while in the UK and did enjoy consuming it there with absolutely no ill effects. I am very keen to be able to supplant my health with it's goodness here, at home.

I am a very square clean living middle aged harmless human. I don't eat wheat, sugar, dairy, alcohol, coffee or any drugs whatsoever. If this product actually fell into any kind of mindbender category I would not be in the slightest bit interested in it - but it does not, so please do vote in favour of allowing us access to a good plant based form of Omega 3, 6 and 9.

Yours Faithfully
Jann French
