Dear FSANZ,

Re: Application A1039.

As an average family Australian household, we would like to extend our support for the Submission of Hemp food products in Australia. We thank you for the invitation to give the public an opportunity to voice an opinion. We have safely used Hemp oil on eczema inflammation to improve the condition of skin for my wife. We understand this is due to the Omega oil composition. We are encouraged by this and would be delighted to be able to consume hemp foods in a hope to make further improvement especially in light of positive results overseas where they already use hemp products more widely.

Many thanks again for your genuine review of this Food Standard Code 1.4.4.

The Swale family.
