Subject: P1036 - Submission by AFGC

Dear FSANZ

The AFGC supports P1036 in its intention to bring the reviewed ANZ Food Standards Code up to date and to correct minor errors. However, the devil lies in the detail in such cases and AFGC awaits with interest the exact amendments proposed to be made under this Proposal.

The AFGC further notes that while P1025 was progressed with detailed industry consultation, neither the industry participants nor FSANZ can claim perfection for the finished product. The AFGC has already identified an anomaly in that the two subclauses in 1.1.1 – 8 are in conflict with each other. P1036 is the ideal vehicle by which such anomalies might be rectified, and the AFGC is happy to call for, and pass on to FSANZ, such further issues as may be identified by its members for FSANZ's consideration (on the understanding that P1036 is not an appropriate vehicle for reform issues and that anomalies are limited to those relating to interpretation and application of the Code).

Regards
