Submission Text:	Although there are a number of primary producers within the City of Kalamunda, experience with melons, berries and leafy greens is limited. From the evidence provided with the proposal, option 2 (development of regulatory measures) is supported. From our records we have just one primary production business relevant (a blueberry farm). However, many other localities may end up with a significant number of new premises to monitor. As such, training to correspond with new legislation is always considered beneficial.
