

Submission for Proposal P1053

Food Safety Management Tools

Thank you for the opportunity to provide feedback on the proposed changes.

As a commercial refrigeration supplier, SKOPE is a keen observer when it comes to food safety and regulation. SKOPE often works with food businesses to enable easier and more accurate ways to monitor refrigerated temperatures. SKOPE does not have relevant data to agree/dispute the proposed changes to the Food Standards Code, however we believe the proposed changes are appropriate. These changes will reduce the occurrence of foodborne disease outbreaks and will better align food safety management across the states of Australia.

Kind Regards,
