To whom it concerns,

As a consumer, I am strongly opposed to eating GMO food.

I take great care to ensure that I eat healthily and take care of my body and my well being. I am also a mother and I am concerned with my children's health .

I would like to know that I am eating GMO products . It is essential that I know what I am consuming!

I hope that common sense will prevail and that as a concerned member of the public, I may be heard.

Please consider the health of the peoples of this great country of ours and let us make our own choices .
