

posol P1007 – Primary Production & Processing Requirements for Raw Milk Products

ow is my submission in support of the continued availability of legal, raw goat milk in the market place in  
eensland. My reasons for this are as follows:-

- To preserve a dynamic, competitive, localised raw milk industry, where the consumer has a choice of type and quality of product.
- Knowledge of conditions under which animals are farmed (e.g. organic, free-range, health, animal welfare etc.) and the knowledge that there are quality control practices in place.
- I feel that any legislation that removes my FREEDOM OF CHOICE to decide between brands and type of milk for my personal consumption an infringement on my BASIC HUMAN RIGHT to choose and make decisions on how I manage my own and my families health.
- I prefer to use raw goat milk to pasteurised goat milk for the following reasons:

- ✓ Palatability.....
- ✓ Easier digestibility.....
- ✓ Retention of both protective and digestive enzymes.....
- ✓ The integrity of the protein profile and fat profile is not compromised. (some proteins and fats are heat sensitive and damaged by the pasteurisation process)

• Other: Freedom of choice

• I was recommended to use raw goat milk by:

- ☒ Naturopath ☐ Doctor

☒ Other: chemist and Local Goats

Further Comments I have never been sick or suffered  
any ill effects from consuming Fresh raw  
milk.
