Dear Foodstandards.

I am writing to express my dismay at the FSANZ stance on raw-milk cheeses.

1. No one has died or become ill from eating the imported raw milk cheeses (as stated in your recent report).
2. Consumers should be able to make the CHOICE to eat the cheese or not. A simple labelling addition can deal with dietary information.

The FSANZ assessment is based on incorrect food science, and should be adjusted accordingly.

Thanks you
